## **DETAILED ACTION**

### ***Election/Restrictions***

In relation to the election requirement, the examiner of record notes for the record the cancellation of claims 10-28 as indicated by the applicant on paper number 8. Claims 1-9 and 29-80 will be examined on their merits.

### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1, 3, 29, 33, 39, 42, 50, 69, and 80** are rejected under 35 U.S.C. 102(b) as being anticipated by **Casper, et al., Schentag, et al., or Yuda, et al.** All the cited patents disclose an openable reservoir that is sealable against leakage of the substance; an actuator mechanism for opening the reservoir; an energy source, operatively connected for powering the actuator mechanism; a releasable latch for controllably switching the application of power to the actuator from the energy source; and a receiver of electromagnetic radiation.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

**Claims 2, 4-9, 30-32, 34-38, 40-41, 43-49, 51-68, and 70-79** are rejected under 35 U.S.C. 103(a) as being unpatentable over **Casper, et al., Schentag, et al., and/or Yuda, et al.** The examiner of record recognizes that the cited references do not disclose specific dimensions regarding the diameter of the coil wires or their length. However, it is well known in the art that the above specific dimensions are used to adjust electromagnetic

field strength according to the area of use within the body. Therefore, the ranges in diameter and length are determined by the particular use of the system in the body. Accordingly, a person of ordinary skill in the art would consider the disclosed dimensions as obvious design alternatives.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel Mendez whose telephone number is 703-308-2221. The examiner can normally be reached on 0730-1800 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Brian Casler can be reached on 703-308-3552. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3590 for regular communications and 703-305-3590 for After Final communications.
